Service Pricing Draft

Draft starting prices researched from small-business/local-agency market
benchmarks

ABOUT THIS DOCUMENT

Service Pricing Draft

Draft starting prices, researched from small-business/local-agency market benchmarks (July 2026). Edit the yellow Suggested Price / Suggested Cost cells to your own numbers, then enter the final values into the Hub's Service Pricing Admin tool. Margin recalculates automatically. Cost estimate basis: HubSpot/Sprout/Klaviyo use real software costs; every other service uses an estimated cost of 30% of price (monthly/retainer services) or 40% of price (one-time setup projects) for labor/delivery time — the same assumption the Proposal Calculator itself falls back to when no real cost is set. Replace with actual contractor/time costs as you get real numbers.

Organic Social

Service	Billing	Price	Cost	Margin	Notes
