

REVITAL PRODUCTIONS

Systems & Ownership Map

The core systems that run this business plus HR and IT as it grows, who owns each one, and the roles the org still needs - so nothing depends on one person.

One Map, Six Systems

Every business is really just four systems working together: Marketing, Sales, Operations, and Finance - the core four every business has, no matter how small. Each one has a goal, a set of processes that get it done, and - the part almost every business owner skips - a clear owner for every single process. Without that last piece, systems exist on paper but the business still runs through one person, because when ownership isn't explicit, everything defaults back to whoever's paying the most attention. Usually that's the founder.

As a business grows past the core four, two more systems show up: HR (once there are people to manage beyond the founder) and IT (once there's a real tech stack to keep running). They're not core - a 3-person shop can operate without either being a dedicated system - but the tasks they cover exist today either way, sitting quietly inside Operations with no real owner. This document breaks them out as two side systems for exactly that reason: not because they need a dedicated hire yet, but because leaving them buried inside Operations is how they stay nobody's job.

This document maps Revital's systems the same way: each one broken into its real processes (pulled from the Complete System Flows & Process Map and the Hub's own tool set), each process assigned to the **role** responsible for it - not a name. At 3 people today, plenty of roles are worn by the same one or two people, and that's expected. The point of mapping it by role instead of by person is that the map doesn't go stale as headcount changes - it shows you exactly which hat everyone is currently wearing, and which roles are sitting empty (future hiring triggers) versus which ones are just quietly still defaulting to the founder.

How to use it: the visual map on the next page is the 30,000-ft view - same shape as the whiteboard exercise of listing every function, its goal, and what falls under it - core four first, then the two side systems. The detailed tables after that spell out every process at the task level with its owning role and which Hub tool supports it. The close of the document flags a couple of roles the org doesn't have a title for yet but functionally needs.

SYSTEM 1

Marketing

Goal: Generate leads and grow Revital's own brand - separate from marketing work delivered to clients.

Plan & schedule own content calendar

Content Manager

Post & manage own social channels

Social Media Manager

Run & monitor own paid ad campaigns

Paid Ads Specialist

Track own SEO health & rankings

SEO Specialist

Send own email / newsletter campaigns

Email Marketing Specialist

Build & update case studies

Content Strategist / Creative Director

Build portfolio showcase collateral

Content Strategist

Collect & manage testimonials

Client Success Manager

Monitor reviews & reputation

Client Success Manager

Track competitor activity

Digital Marketing Strategist

Plan the marketing budget

Digital Marketing Strategist

SYSTEM 2

Sales

Goal: Convert leads into signed, paying clients. Idle today - Leads List & Pipeline are empty until Phase 2.

SYSTEM 3

Operations

Goal: Deliver the work, on time and on quality, and keep the business running day to day. The biggest system - shown here as its sub-flows.

Client Onboarding

Pre-Production

Shoot Day

Post-Production & Delivery

Ongoing & Offboarding

SYSTEM 4

Finance

Goal: Manage cash flow and profitability. Money in is solid; money out & full P&L reporting are still open per the Gaps Plan.

SIDE SYSTEM

Human Resources (HR)

Goal: Keep the people side running - hiring, payroll, compliance. Not core at 3 people, but the tasks already exist.

Information Technology (IT)

Goal: Keep the Hub and every tool it depends on running, secure, and backed up.

SYSTEM 1

Marketing

Goal: generate leads and grow Revital's own brand - this is Revital marketing itself, separate from marketing work delivered to clients (that's Operations, since for an agency, client delivery is the product).

Process / Task	Owning Role	Hub Tool / System
Plan & schedule Revital's own content calendar	Content Manager	Revital Marketing
Post & manage Revital's own social channels	Social Media Manager	Revital Marketing
Run & monitor Revital's own paid ad campaigns	Paid Ads Specialist	Revital Marketing
Track Revital's own SEO health & rankings	SEO Specialist	SEO Rank Tracker, Revital Marketing
Send Revital's own email / newsletter campaigns	Email Marketing Specialist	Revital Marketing
Build & update case studies	Content Strategist / Creative Director	Case Study Builder
Build portfolio showcase sales collateral	Content Strategist	Portfolio Showcase
Collect & manage client testimonials	Client Success Manager	Testimonial Tracker
Monitor reviews & online reputation	Client Success Manager	Review & Reputation Tracker
Track competitor activity	Digital Marketing Strategist	Competitor Analysis
Stay current on marketing industry trends	Digital Marketing Strategist	Marketing News Feed
Personal branding content (leadership)	Creative Director	Personal Branding Builder
Plan Revital's own marketing budget	Digital Marketing Strategist	Marketing Budget Calculator

SYSTEM 2

Sales

Goal: convert leads into signed, paying clients. Currently idle per the Business Phase Roadmap - the Leads List and Sales Pipeline are empty until Phase 2 starts. This is the map for when that switches on.

Process / Task	Owning Role	Hub Tool / System
Log new leads into the CRM	New Business Representative	ClickUp CRM
Research / pre-qualify a lead before the call	Sales Coordinator	Intake Pre-Qualifier
Run discovery calls	Business Development Manager	Discovery Call Script
Score post-call fit (Not a Fit / Possible / Strong Fit)	Business Development Manager	Discovery Call Script
Build pricing & proposals	Business Development Manager	Proposal Calculator, Service Pricing Admin
Run red-flag screening on new deals	Business Development Manager	Red Flag Checklist
Send & track the follow-up sequence	Sales Coordinator	Proposal Follow-up Tracker
Close signature & first payment	Business Development Manager	Contracts, Stripe
Source referral / partner leads	Partnerships Manager	Referral Tracker
Track win / loss outcomes	Sales Coordinator	ClickUp Win/Loss Tracker
Larger RFP / bid responses (later stage)	Proposal & Bids Specialist	Proposal Calculator

SYSTEM 3

Operations

Goal: deliver the work, on time and on quality, and keep the business itself running day to day. The biggest system by far - it covers client delivery (pre-production through offboarding), AV production specifically, and internal admin. Split into sub-groups below rather than one long table.

Client Onboarding

Process / Task	Owning Role	Hub Tool / System
Intake form & red-flag review	Account Coordinator	Intake Request, Red Flag Checklist
Build the client's Hub portal	Account Coordinator	Client Portal Manager
Kickoff prep & call	Producer / Account Manager	Kickoff Prep
Send the welcome guide	Account Manager	Client Welcome Guide
Build content strategy & run initial audits	Digital Marketing Strategist	Content Strategy Builder, Audits

Pre-Production

Process / Task	Owning Role	Hub Tool / System
Scripting & content planning	Scriptwriter / Content Strategist	Creative Brief Generator, Copywriting Assistant
Storyboarding	Storyboard Artist	Creative Brief Generator
Call sheets & shoot scheduling	Production Coordinator	Call Sheet Builder, Timeline Scheduler
Location scouting	Location Scout	Venue & Tech Spec Library
Crew & gear booking	Studio Manager	Resource Booking Calendar, Vendor Rental Tracker

Shoot Day

Process / Task	Owning Role	Hub Tool / System
Direction, camera, lighting, sound	DP / Camera Operator / Gaffer / Grip / Audio Technician	On-set - not Hub-tracked
Production assistance & footage logging	Production Assistant	Raw Footage Tracker
Running the shoot day schedule	Production Coordinator	Run of Show Tracker

Post-Production & Delivery

Process / Task	Owning Role	Hub Tool / System
Editing	Video Editor	ClickUp delivery lists
Motion graphics, color, sound mix	Motion Graphics Designer / Colorist / Sound Designer	ClickUp delivery lists
QC before the client sees it	Senior Editor / Post-Production Supervisor	QC Checklist
Client review & approvals	Account Manager	Client Portal Manager
Handle revisions	Producer	Revision Feedback Tracker
Build & send monthly reports	Account Manager	Monthly Report Archive, QBR Generator

Ongoing Account Management

Process / Task	Owning Role	Hub Tool / System
Weekly account check-ins	Account Manager	Weekly Account Check-in
Monitor account health	Account Manager	Agency Health Dashboard
Scope changes / change orders	Account Manager	Change Order Generator
Renewals	Account Manager	Renewal Tracker
Offboarding	Account Manager	Client Offboarding Checklist

Internal Admin & Logistics

Process / Task	Owning Role	Hub Tool / System
Team scheduling & time off	Studio Manager	My Time Off, Team Roster
Hours & capacity tracking	Operations Manager	Hours Tracker
Equipment & gear tracking	Equipment / Gear Manager	Cheqroom (planned, Phase 4)
Internal SOPs & knowledge base	Operations Manager	SOP Wiki
Legal document management	Operations Manager	Legal Documents, Contracts

Hiring/onboarding and the Hub/tech stack used to sit in this list too - they're broken out as their own side systems (HR and IT) after Finance below, since they're distinct enough to need their own clear owner rather than riding along inside Operations.

Future: Live Events (Phase 4)

Process / Task	Owning Role	Hub Tool / System
Live event production	Live Events Producer / Technical Director	Not yet built
Live A/V operation	A/V Technician	Not yet built
Stage management	Stage Manager	Not yet built
Event gear management	Equipment / Gear Manager	Shared with Pre-Production

SYSTEM 4

Finance

Goal: manage cash flow and profitability. Money coming in is solid (Stripe + Contract & Invoice Tracker); money going out and full P&L reporting are still open per the Business Operations Gaps Plan - QuickBooks Free is active and Simple Start is being purchased now for Stripe sync.

Process / Task	Owning Role	Hub Tool / System
Client invoicing & billing	Bookkeeper / Finance Manager	Contract & Invoice Tracker, Stripe
Chase failed / declined payments	Bookkeeper / Finance Manager	Stripe alert to invoices@
Accounts payable / vendor bills	Bookkeeper / Finance Manager	QuickBooks Essentials (open decision)
Bookkeeping & QuickBooks management	Bookkeeper / Finance Manager	QuickBooks
P&L & cash-flow reporting	Bookkeeper / Finance Manager	QuickBooks
Track subscription / tool costs	Operations Manager	Subscription & Tool Cost Tracker
Manage business insurance policies	Operations Manager	Business Insurance Tracker
Set pricing strategy	Founder/CEO + Business Development Manager	Service Pricing Admin
ROI / payback modeling for proposals	Business Development Manager	ROI Projector, Payback Period Calculator
Payroll (once first W2 hire)	Bookkeeper / Finance Manager	Gusto (planned)

SIDE SYSTEM

Human Resources (HR)

Goal: keep the people side of the business running - hiring, onboarding, payroll, and compliance - so the team can operate and grow. Not core at 3 people, but the tasks below already exist; this just gives them a real owner instead of letting them default to the founder. Matches Gap 3 (Internal HR/Payroll) in the Business Operations Gaps Plan and the Payroll & HR layer in the Tech Stack Plan.

Process / Task	Owning Role	Hub Tool / System
Recruiting & hiring	HR Coordinator (Founder/CEO today)	Not yet built
Internal onboarding (new hire/contractor setup)	HR Coordinator	Not yet built
Payroll administration	Bookkeeper / Finance Manager	Gusto (planned, first W2 hire)
Benefits administration	HR Coordinator	Gusto (planned)
PTO & time-off tracking	HR Coordinator	My Time Off
Performance reviews	HR Coordinator	Not yet built
Employee handbook & policies	HR Coordinator	Not yet built
Compliance milestones (1099s, W2s, Title VII, COBRA, FMLA, ACA)	HR Coordinator + Bookkeeper	QuickBooks, Gusto (planned)

SIDE SYSTEM

Information Technology (IT)

Goal: keep the Hub and every tool it depends on running, secure, and backed up. Every process in this entire document touches the Hub somewhere - this is the system that keeps that layer itself healthy, which nothing else in the role list currently owns.

Process / Task	Owning Role	Hub Tool / System
Build & maintain the Hub itself	Systems Administrator*	Entire Hub
Manage integrations (Stripe, Resend, ClickUp, Zapier, Google)	Systems Administrator*	Entire Hub
Data backups & disaster recovery	Systems Administrator*	Backup & Restore Runbook
Access & permissions management	Systems Administrator*	Team Access Manager
Software licenses & equipment troubleshooting	Systems Administrator*	Subscription & Tool Cost Tracker
Security & uptime monitoring	Systems Administrator*	Cloudflare

Every row above lands on the same role because at 3 people, it's genuinely one hat, not six - the point of listing them separately is so each piece is visible and delegable on its own once someone actually wears that hat, instead of staying one undifferentiated "figure out the Hub stuff" pile.

Roles the Org Is Missing

Systems Administrator — recommended addition

Now the formal owner of the IT side system above. Every single process in this document runs through a Hub tool, an integration, or a piece of the stack (Cloudflare, Firestore, Stripe, Resend, ClickUp, Zapier) - but nobody on the current role list was actually responsible for that layer existing and working. Right now it defaults to whoever's building it, which is exactly the invisible-dependency pattern this whole map is meant to catch. Doesn't need to be a dedicated hire yet at 3 people - but it should be a named hat someone explicitly wears, not something that's nobody's job.

Director (Shoot Day) — optional, not urgent

Standard AV-industry title for overall creative direction on set, distinct from the Director of Photography (camera/lighting) role already in the list. At current scale this is reasonably folded into Producer or Creative Director on most shoots - flagging it here only because it's a real, separate function once shoot complexity or crew size grows enough that one person can't run both the creative call and the camera department at once.

Using This to Delegate

The video this map is based on recommends a snowball order: delegate the smallest, most self-contained roles first, since each one handed off frees up time to tackle a bigger one next. On this map, that means starting with roles like Production Assistant, Sales Coordinator, or Content Manager - narrow, well-defined, easy to hand a Hub tool and an SOP for - before judgment-heavy roles like Account Manager or Business Development Manager, which need more context and trust built up first. When a role does get handed off, the other half of the fix from the video matters just as much as picking the right order: walk the person through this map and the relevant SOP Wiki entry so they understand why the role matters, not just what to click.
