

INTERNAL REFERENCE - USE PER CLIENT

Paid Client Checklist

For every paying client, start to finish. Companion to the Free Client Wrap-Up Checklist - that one is about turning free work into proof; this one is about keeping paid work healthy, renewing, and growing instead of quietly slipping toward churn.

1. Kickoff (First 30 Days) - Start It Right

- ☐ Intake form & red-flag review complete
Intake Request, Red Flag Checklist
- ☐ Client's Hub portal built and live
Client Portal Manager
- ☐ Kickoff call held
Kickoff Prep
- ☐ Welcome guide sent
Client Welcome Guide
- ☐ Content strategy & initial audits built
Content Strategy Builder, Audits

2. Ongoing Health Rhythm - Keep It on Track

The recurring cadence, not a one-time setup.

- ☐ Weekly account check-in actually logged, not skipped
Weekly Account Check-in
- ☐ Account health score reviewed, not just left sitting there
Agency Health Dashboard
- ☐ Deliverables pass QC before the client ever sees them
QC Checklist
- ☐ Monthly report built, QC'd, and delivered on time
Monthly Report Archive, QBR Generator

3. Growth & Retention Watch - Don't Wait for a Problem

The Hub already flags most of this automatically - the job is acting on the nudge, not spotting it.

- ☐ A scope-creep nudge turns into an actual Change Order, not free work absorbed quietly
Change Order Generator
- ☐ An upsell nudge gets a real look, not just a dismissed notification
Agency Health Dashboard
- ☐ A testimonial or case-study moment gets flagged when it happens - paid clients are proof too, not just the free ones
Testimonial Tracker, Case Study Builder
- ☐ The renewal conversation starts when the renewal nudge fires, not after the contract's already expired
Renewal Tracker

4. If It's Ending

- ☐ A stale-client or low-pulse alert gets a real response, not just a read receipt
- ☐ Decide: renew, or offboard gracefully - don't let it drift unanswered
- ☐ If offboarding: run the standard access/CRM teardown
Client Offboarding Checklist (Hub tool) - not duplicated here

This checklist is the layer above the Client Offboarding Checklist Hub tool, not a replacement for it - use this one for the day-to-day and growth/retention judgment calls, then run the Offboarding Checklist for the access/CRM teardown mechanics once a client is actually closing out.
