

REVITAL HUB — TEAM ACCESS

Role-Based Access Breakdown

Which Hub sections each role tier sees by default, and why. July 2026.

Picking a role tier in Team Access Manager auto-checks the sections below as a starting point. Every checkbox stays individually editable afterward, so a specific person can always get more or less than their tier's default.

TIER 1

Full Access — Leadership

Founder / CEO • Creative Director • Executive Producer • Chief Operating Officer (COO) • Head of Strategy

SECTIONS GRANTED

Core, Account Management, Production, Content Creation, Account Ops, Audits, Strategy & Competition, Sales Pipeline, Client Retention, Social Proof, Agency Globals

Everything. No restrictions — this tier sees the entire Hub.

TIER 2

Sales & Business Development

Business Development Manager • New Business Representative • Sales Coordinator • Partnerships Manager • Proposal & Bids Specialist

SECTIONS GRANTED

Sales Pipeline, Social Proof, Strategy & Competition

No Client Retention — referrals/renewals are treated as account management's job, not new-business sales.

TIER 3

Account Management / Client Services

Producer • Senior Producer • Account Manager • Account Coordinator • Client Success Manager

SECTIONS GRANTED

Core, Account Management, Production, Content Creation, Account Ops, Client Retention, Social Proof

No Sales Pipeline — that's pre-close, less relevant once an account manager has inherited a client.

TIER 4

Digital Marketing

Digital Marketing Strategist • Social Media Manager • Content Manager • SEO Specialist • Paid Ads Specialist • Email Marketing Specialist • Analytics / Reporting Specialist

SECTIONS GRANTED

Account Management, Content Creation, Account Ops, Audits, Strategy & Competition

No sales-side access at all — this tier is purely execution/delivery.

TIER 5

Operations & Admin

Studio Manager • Operations Manager • Executive Assistant • Bookkeeper / Finance Manager • HR Coordinator

SECTIONS GRANTED

Core, Account Management, Agency Globals

The narrowest tier — visibility into client status and internal admin tools, not the marketing/sales/production work itself.
