

REVITAL PRODUCTIONS

E-Signature Setup Guide DocuSign

A 30–45 minute setup walkthrough for adding legally binding e-signatures to the contract signing flow.

SAVE FOR WHEN READY • INTERNAL REFERENCE • AUGUST 2026

Overview

FEATURE	DETAILS
Cost	\$25–45/mo — Standard plan (Personal doesn't include reusable Templates)
Envelopes	Unlimited sending under Standard — lower tiers cap envelope volume
Google Drive	Via the DocuSign eSignature Google Workspace add-on — completed envelopes can write back to Drive automatically
Setup Time	About 30–45 minutes
Client Experience	No account needed to sign — one click from email
Legal Standing	Legally binding in all 50 states + a Certificate of Completion audit trail
Hub Calculator	Keep as-is — DocuSign only handles signatures

Updated Contract Signing Flow

Once DocuSign is set up, your signing process becomes:

STEP	ACTION	TOOL
1	Build proposal in Hub Proposal Calculator	Revital Hub
2	Download Proposal PDF	Revital Hub
3	Open DocuSign → Templates → SOW Template	DocuSign
4	Enter client name and email as the Client role → Send	DocuSign
5	Repeat for MSA Template	DocuSign
6	Client signs both digitally from their email — no account needed	DocuSign
7	You countersign as the Company role — both parties get a signed copy + Certificate of Completion	DocuSign

Setup Steps — About 30–45 Minutes Total

STEP	ACTION	TOOL
8	Signed docs save to Google Drive → Contracts & Legal	Google Drive
9	Confirm first Stripe payment received	Stripe
10	Begin onboarding — send intake form	Gmail + Hub

Step 1 — Create Your Account (\$25–45/mo, 5–10 min)

- 1 Go to docusign.com → Plans & Pricing → choose Standard (required for reusable Templates — Personal doesn't include them).
- 2 Sign up with your @revitalproductions.com Google account (Sign in with Google).
- 3 Confirm the Standard plan is active before building templates — DocuSign's free trial defaults to time-limited access to paid features, so check the current trial terms at checkout since they change.
- 4 Add billing once you're ready to go live.

Step 2 — Connect Google Drive (10 minutes)

- 1 From the Google Workspace Marketplace, install "DocuSign eSignature for Google Workspace."
- 2 Once installed, open Google Drive → right-click a file → Open with → DocuSign to send it for signature directly from Drive.
- 3 In DocuSign, connect Google Drive as a storage destination under your account's connected apps/cloud storage settings — the exact menu label can shift, so follow DocuSign's own in-app prompts if this step doesn't match exactly.
- 4 Set the destination folder to: Revital Productions → Contracts & Legal.
- 5 Completed envelopes now write back to that Drive folder automatically.

Step 3 — Build Your SOW Template (10–15 minutes)

- 1 Go to Templates → New → Create Template.
- 2 Upload your SOW PDF (export from ClickUp).
- 3 Add two recipient roles: "Company" (Revital Productions) and "Client."
- 4 On the document, drag these fields: Signature, Date Signed, Full Name → assign to Company; Signature, Date Signed, Full Name, Title, Company Name → assign to Client.
- 5 Name the template: "Revital Productions — SOW Template."
- 6 Save.

SETUP STEPS (CONTINUED)

Finish Setup & Test

Step 4 — Build Your MSA Template (10 minutes)

- 1 Same process as Step 3.
- 2 Upload the MSA PDF → add the same recipient roles and fields.
- 3 Name the template: “Revital Productions — MSA Template.”
- 4 Save.

Step 5 — Test Everything (10 minutes)

- 1 Go to Templates → select SOW Template → Use.
- 2 Enter your own email as the Client recipient.
- 3 Send it to yourself.
- 4 Sign it as the Client from your email.
- 5 Then sign as Company (Revital Productions) to countersign.
- 6 Confirm the completed envelope — with its Certificate of Completion — lands in your connected Google Drive folder.
- 7 If everything works — you are ready to go live.

After Setup — Update the Contract Signing SOP

Once DocuSign is live, update the Contract Signing Process SOP in ClickUp:

- Replace Section 4 manual signing instructions with the DocuSign workflow
- Remove the print/sign/scan instructions
- Update Section 6 filing process — signed copies now save to Drive automatically
- Update the Contract Signing Checklist at the bottom of the SOP

Or just tell Claude “DocuSign is set up — update the Contract Signing SOP” and it will be done in a few minutes.

E-Signature Tool Comparison

TOOL	COST	BEST FOR	COMBINE WITH HUB?
DocuSign	\$25–45/mo	Most recognized brand — best if clients expect a familiar signing experience	Yes
Dropbox Sign (HelloSign)	\$15/mo	Small agencies — simple, unlimited, Google Drive sync	Yes — cheaper alternative
PandaDoc	\$19/mo	Proposal + signature in one tool — replaces Hub calculator	Would replace Hub
Adobe Sign	\$14–23/mo	If already using Adobe Creative Cloud	Yes
signNow	\$8/mo	Budget option — basic functionality	Yes

PandaDoc would replace your Hub Proposal Calculator — not recommended. Your Hub calculator is more powerful and purpose-built for your agency. Keep the Hub for proposals and use DocuSign just for signatures.
